

# MANAGEMENT SYSTEM POLICY

QUALITY / ENVIRONMENT / SAFETY

As the development of renewable energies takes hold throughout the world, offshore wind is among the most suitable solutions. BW Ideol, a pioneer in the floating wind segment, is determined to pursue an environmentally virtuous approach across its two business lines: as a technology provider and as a project co-developer.

We have set in place a management system that reconciles the achievement of our strategic objectives while pursuing a process of continuous improvement in terms of the quality of our products and our environmental performance.

We are determined to fully embrace the ISO 9001 & ISO 14001 certifications at BW Ideol. This involves all stakeholders, and each contribution makes BW Ideol a key player in the field.

Paul de la Guérivière  
CEO

BW *ideol*

QUALITY

- **Anticipate our customers' needs and expectations**, together with those of all other interested parties who may contribute towards our success or be impacted by our activities, and establish a relationship of trust with all our customers and business partners
- **Develop and capitalize on our expertise**, to ensure the success of future projects and support our organization's growth and employees' development by building cohesion within our teams and helping them flourish in their work
- **Deliver our projects** once all applicable requirements have been addressed, and assess, anticipate and control risk by ensuring the health and safety of our employees and monitoring the activities of our subcontractors
- **Continuously improve** our work practices and the performance of our processes

ENVIRONMENT

As part of the continuous improvement of its environmental management system and in order to boost its environmental performance, BW Ideol must:

- **Demonstrate the reduced impact our solution has on the environment**, on water and animal life
- **Measure the carbon footprint** and recycling rate of our solutions
- **Meet the requirements for environmental compliance**
- **Prevent pollution** associated with our activities to protect the environment

SAFETY

The safety of people and installations is a key concern for BW Ideol and together we must all:

- **Systematically adopt a risk management approach** in all our projects, identifying, assessing and rectifying the risks
- **Identify and study every incident / accident** to prevent them from recurring
- **Meet the requirements for safety compliance**
- **Communicate internally / externally** about our ambitions regarding safety to ensure that everyone is engaged in safety performance.
